Openings in Computer Vision at HP Labs India

HP Labs India has immediate openings for post-docs to work in the area of computer vision, image analysis and pattern recognition. Intern applications will also be considered.

With the increasing availability of better image sensors and proliferation of cameras, the use of cameras in human-computer interaction and passive surveillance have become problems of great interest. We are interested in the problems of gesture recognition, user activity analysis, facial analysis and tracking people using stereo or depth camera based techniques.

We are looking for candidates who:

- are enrolled in (or recently graduated from) MS/PhD programs in computer science or electrical engineering
- have hands-on programming experience in C/C++, and
- have research experience in the areas of computer vision, image analysis and pattern recognition.

The tenure is up to 1 year for post-docs, with possibility of extension, and 4-6 months for interns.

To apply, please email your resume to hplindia.careers@hp.com with an appropriate subject line:

    Post-doc in computer vision
 or
    Internship in computer vision

HP Labs India was established in February 2002 with the principal focus on creating new technologies for addressing the IT needs of the next billion customers for HP. For more information on HP Labs in India, see www.hpl.hp.com/india
